

Second Transnational Project Meeting

The second transnational meeting of the project took place last September in Prague, Czech Republic. The consortium met once again with the aim of addressing the most important aspects to continue with the proper development of the project. This meeting was really successful, not only because it offered an overview of the current situation and the functioning of the project, but also because it was possible to determine the next activities to be carried out in the second intellectual output of the project.

IO2

During the last months, the partnership of the WINGS project has been working in the educational content that will be offered in the project's website once the project is finished. Six teaching notes have been developed addressing the following topics: Global Entrepreneurship Mindset, Core Competences of Entrepreneurship, Management of Uncertainty, Intercultural Communication, Marketing Skills and Business Skills.

These topics were chosen by the entire partnership according to the competencies that the previous study carried out in the first intellectual output pointed out as the most important ones to take into account for the internationalization of a company. Also, the team carried out a pilot testing for the teaching notes, in which 10 trainers from each country provided feedback on each of the teaching notes and evaluated them so that, counting on their opinion, the partnership can make all the arrangements needed and deliver the final version of the course content.

IO3

The first steps for the implementation of the internationalization serious-game in the platform of the project have been also carried out, since a set of storyboards have been scheduled to serve as the scenarios on which the final serious game will be based.
